

SHERWOOD MODEL S-5000 20+20 WATT STEREO AMPLIFIER

NOTES

*Match within 5%. All resistors are 1/2 watt, with 117V power source. Voltages shown in parentheses are rms mid-frequency sensitivities for 20 watts output with tone controls at flat 400V, molded paper; other capacitors, except electrolytics, are in µF and are mica or ceramic.

Selector and Function switches are shown in their most counter-clockwise (Up and Per-Off) positions. Push buttons shown in un-depressed positions.

Notation	Multiplier
K	1,000
M	1,000,000
µ	1/1,000,000

Serial No. 959000 and up
