

SSW-212 & SSW-210 POWERED SUBWOOFERS

GROUND-BREAKING DESIGN. GROUND-BREAKING PERFORMANCE.

SSW-212 and SSW-210 Powered Subwoofers by Infinity

The SSW-212 and SSW-210 powered servo-controlled subwoofers from Infinity. With ground-breaking design, each delivers ground-breaking performance as a superb upgrade for your quality speaker system. The dynamic performance of these subwoofers will also bring breathtaking new dimensions to your home theater installation.

The SSW-212 and SSW-210 artfully add the final touch of musical realism (the lowest and most powerful fundamental octaves of music) generally missing even in most high quality, full-range speaker systems. The pair of drivers in each of the two subwoofers couple to produce deep, clean and "fast" low frequencies that are harmonically true to the music.

Experience astonishing improvement in the bass performance of your system – without adding amplification or using lots of space. The unique cabinet design, adjustable crossover and output level controls of the SSW-212 and SSW-210 allow you to simultaneously optimize sonic performance and visual presence. You'll find either subwoofer acoustically and aesthetically ideal for your audio, home theater or recording studio environment.

GROUND-BREAKING PERFORMANCE IMPROVEMENTS

Frequency response to 25Hz (SSW-212) and 30Hz (SSW-210) provides the musical realism and dynamics of the low octaves missing in many speaker systems. The powerful, clean and harmonically true bass produced by the two IMG™ (Injection Molded Graphite) drivers in each

subwoofer deliver a demonstrable upgrade in sonic performance with virtually every quality system. Power delivery of the SSW's is effortless. Bass transients are pure. Musical accuracy is exceptional.

DESIGNED TO INTEGRATE ROOM AND SOUND

The SSW-212 and SSW-210 look stunning when lying down, standing up or corner-loaded. And they perform beautifully in all configurations. The variable low-pass filter crossover and continuously variable output level control allow precision level and balance adjustments for a seamless match to your room, speaker system and music preferences. Choose a black oak vinyl or honey oak veneer finish.

BUILT-IN, DRIVER-OPTIMIZED AMPLIFICATION
Effortless power is ensured by high-powered, low-distortion, high-current amps which are driver-optimized for clean and articulate bass response. (SSW-212: 300 watts, RMS; SSW-210: 250 watts, RMS)

SERVO-CIRCUITRY CONTROLS INFINITY IMG™ DRIVERS

Harmonically accurate reproduction and pure transient response – even during sharp bursts of bass energy – is achieved by unique internal servo-controlled circuitry between amplifier and driver-pairs. Maximum impact and accuracy are further ensured by high-current, long-throw voice coils and the unique Infinity IMG™ woofers.

ON-BOARD ELECTRONICS AND CONTROLS
Variable crossover and continuously variable output level

controls allow for seamless sonic integration with any quality entertainment system.

UNIQUE AND VERSATILE CABINET DESIGN

Cabinets can be set horizontally (by slanting the baffle board downward with optional end caps) or vertically so that the drivers address the room for optimal acoustic performance and aesthetics.

LOW-LEVEL (PRE-AMP) INPUTS HIGH-LEVEL (AMP) INPUTS

Amplifier inputs are compatible with all types of power amplifiers, audio/video receivers and pre-amps. Low level connectors are gold plated for corrosion-free hookup.

PROTECTION SYSTEM

Subwoofers are protected from voltage surges by an AC line fuse.

OPTIONAL END PANELS (SSW-212EP, SSW-210EP)

Color matched optional end-panels add the finishing touch to high-performance “down-firing” horizontal installations – in an open area of the floor, under a shelf, or within custom entertainment cabinetry.

SPECIFICATIONS

SSW-212 Powered Subwoofer System

DRIVER COMPLEMENT: Dual 12-inch IMG™
Woofers

FREQUENCY RESPONSE: 25Hz - 120 Hz

CROSSOVER FREQUENCY: 40 Hz - 120 Hz,
continuously variable

AMPLIFIER POWER OUTPUT: 300 Watts RMS

CABINET FINISH: Black Oak Vinyl, Honey Oak Veneer

DIMENSIONS: 20¼" H, 31½" W, 11¼" D

SHIPPING WEIGHT: 72 lbs.

SSW-210 Powered Subwoofer System

DRIVER COMPLEMENT: Dual 10-inch IMG™
Woofers

FREQUENCY RESPONSE: 30 Hz - 120 Hz

CROSSOVER FREQUENCY: 40 Hz - 120 Hz,
continuously variable

AMPLIFIER POWER OUTPUT: 250 Watts RMS

CABINET FINISH: Black Oak Vinyl, Honey Oak Veneer

DIMENSIONS: 18¾" H, 26" W, 9¾" D

SHIPPING WEIGHT: 58 lbs.

WARRANTY

5-year limited transferable warranty, parts and labor.

1-year limited warranty on amplifier components.

We get you back to what it's all about. Music.
